

# LACRIMA CHRISTI

LACRIMA CHRISTI is a small kennel existing already for over 3 decades, registered in 1992 under Croatian Kennel Club & FCI (Fédération Cynologique Internationale) flag, owned by us – Anita & Zeljko Radic, Croatia. Later on our older son Andrija joined us in all the care, planning and showing our own dogs to their perfection.

The passion for the beautiful breed dalmatians has been leading us through all these years and brought us to the very top of world's most famous dalmatian kennel names.

Our dogs are very well known on all continents. We are more than proud that we helped many young breeders starting young kennels with our dogs and more than proud of very famous old dalmatian kennels improving their breeding with our dogs. Our dogs proudly carry our kennel names on the dog shows gaining remarkable titles.

Gracefulness, health, construction and temperament have been our guiding stars from the very first moment, with selective combining of two most important facts – phenotype and genotype.

We breed under FCI standard, usually having one litter per year, carefully choosing future parents and at the end, carefully choosing our future puppy owners.

Our aim is to produce the best quality dalmatian conforming to the standard, passing extraordinary genes to the next generations and using healthy dogs with healthy pedigree. All our litters come from healthy scanned lines far back through generations.

Developing a bloodline that is well considered and that is a positive influence for the breed, takes considerable discipline. To effectively read pedigrees, by developing sufficient familiarity with the dogs being able to mentally access both their phenotype and genotype. Disregard superfluous information about show records, they are useless for evaluation of bloodlines. Comprehending a breed standard involves more than merely reading it, or an ability to recite it. Most of all, it means grasping its basic intent. It is vital to have a clear idea of what is specified by the general appearance.

When your eye becomes conditioned to seek balance, you will always evaluate the entire dog and never be drawn to any detail at the expense of the overall picture. Every feature and their nature of inheritance must be studied and understood before you can “manage” the inheritance variables.

Our aim is to leave a breed in better shape than it was when we came upon it, and that is the greatest compliment a breeder can get.

Dalmatian is a real “cynological jewel”, in all his attributes:

The beauty of his outlook, elegance of movement, harmony of body proportions, noble attitude and behaviour, graciuos walk, speed of movement, lively temperament, strong and good natured character, intelligent eye expression, quick learning and accomodation to different circumstances, devotion to his master...

Attractive body colour – white base with black or liver spots – reminds to Dalmatian craggy region.

Wonderfull companion to children, adults and older people.

Loved all over the world and spread on all continents...
